Favorite part about living in NWA: Coming from places that are very flat, it's been nice experiencing hills and the gorgeous views they provide. Additionall y, the people here are incredibly friendly and welcoming.
Favorite part about working in Residence Education or University Housing: The ability to work with and develop student leaders, such as RAs.

There will be a green oversized receptacle with a yellow lid on each floor in your residence hall. These containers are not for trash containers. These containers are designed to help University Housing reach the zero-waste goal set by the campus. We are excited about the mixed recycling containers in as this will eliminate the need to pre-sort any of the recyclable material you have accumulated.
